ABOUT ME

I cherish independence and schedule flexibility as a front-end developer. I want to be a proficient individual contributor in front end development who can support people in finding solutions to their issues. My experience in the design industry, working with design teams, ability to manage various client expectations and projects, and excellent communication skill with stakeholders set me apart from other candidates. I'm also used to working with minimum supervision and tight deadlines.

EDUCATION

RevoU (January, 2023 – August, 2023)
